

Ramdoot Global

Global Grain and Lentils Exporter

Introduction

Ramdoot Global is a premier food grain export company based in Maharashtra, India. Established with a vision to bridge the gap between Indian agricultural excellence and global demand, we specialize in sourcing, processing, and delivering high-quality food grains over the last 10 years in local markets.

With deep-rooted connections in India's rich agricultural sector, Ramdoot Global ensures the procurement of the finest grains directly from trusted farmers and suppliers. Our state-of-the-art processing and packaging facilities adhere to stringent international quality standards, guaranteeing purity, freshness, and nutritional value in every shipment.

Our Vision

Become one of the leading Agro Commodity & Food Grain exporters from India

Our Mission

Export the best & healthy quality of products and help our farmers to grow and clients happy.

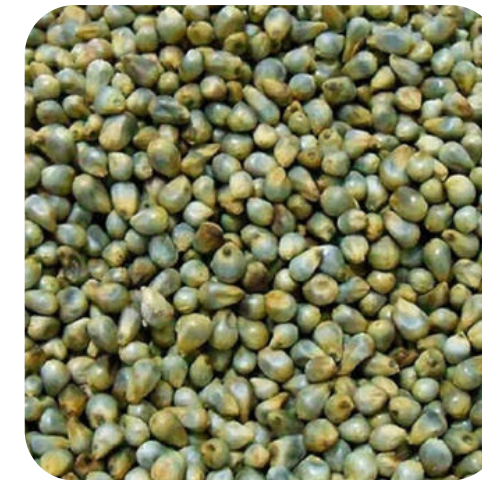

Grain Products

Maize

High quality Maize processed in hygienic conditions to provide quality food for Human consumption and animal feed as well as cattle feed.

Green Millet/Pearl Millet

The finest grade of Millet/Bajra is free from any foul smell and highly suitable for poultry feeding as well.

Sorghum

Best quality sorghum by directly sourcing from local Farmers and Suppliers. It is used as food, animal feed, preparing bio fuels and beverages.

Wheat

The best quality Wheat Grains are procured from our local farmers. Fresh Indian Milling Wheat is a perfect choice for wholesome nutrition.

Grain Products

Finger millet/Ragi

Finger millet is popularly used as a nutritious food for growing children and diabetic patients to control sugar. Experts also suggest it for weight loss .

Non Basmati Rice

Different types of rice are cultivated in the fertile lands of our local farmers. We supply the best quality packed / unpacked brown and white/polished rice.

Pulses Products

Chana (Brown/Pink)

Cultivated in the fertile lands by our local farmers. We provide both brown and pink-skinned chana. Brown Chickpea seeds are high in protein.

Black Gram/Urad

Black gram is a high-energy pulse, rich and hearty. It is commonly used in Indian dals, curries, and in south indian cuisine in fermented form.

Green Gram/Moong

The popularity of Green Gram is increasing worldwide because of its high nutritional value. We source and export high-quality whole moong from our local farmers.

Chickpeas/Kabuli Chana

Chickpeas are renowned for their delicious nut-like taste and high protein content. India is the world's largest producer of Kabuli Chickpea

Pulses Products

Pigeon Pea/Toor Whole

It is a legume widely appreciated in Indian cuisine and beyond for its nutritional benefits and versatility.

Soybean

Soybean is mainly used in edible oil production. It is also used to produce multiple products like soya sauce, tofu, soya milk, and animal food.
